# CISCO LYNKSYS WI-FI ROUTER

CISCO LYNKSYS WET610 & WES610 WI-FI ROUTER INSTALLATION PREPARATION

In addition to a Lynksys router with its power source, you will need a laptop with an Ethernet connectivity test preloaded, an Ethernet cable and a paper clip.

SET-UP INSTRUCTIONS:

1. CONNECT & POWER UP THE ROUTER
Connect power & Ethernet cords into Linksys device

2. CONNECT TO LAPTOP
Connect other end of Ethernet cord into laptop

3. CLEAR ANY EXISTING WI-FI CONNECTIONS
Disconnect from any Wi-Fi connections on laptop, or disable Wi-Fi

4. RESET THE ROUTER
Reset your Linksys with a paper clip, hold down for approximately 10 seconds

Wait 1-3 minutes until lights on Linksys are solid

4. OPEN A BROWSER ON THE LAPTOP AND TYPE IN THE ROUTER'S IP ADDRESS
Open up a browser on your laptop, preferably Chrome or Firefox

Type in **169.254.1.250** in the address bar and press enter

5. ENTER USER NAME AND PASSWORD
When prompted, **leave the user name blank,** and enter **admin** as password

6. SELECT WIRELESS TAB
When Interface page appears, click on Wireless Tab

7. SELECT WIRELESS SITE SURVEY TAB
Click on **Wireless Site Survey Tab** and wait for networks available to load

8. FIND YOUR DESIGNATED NETWORK
Connect to **designated network** with the highest percentage, i.e. HHONORS – 60%

9. LOOK FOR A CONNECTION
If successful, a "Connected" page will display

10. NO CONNECTION? NEXT STEPS:
If a **"Connected"** page does not appear follow directions below. Repeat steps 4-9 above

Connect to a network with the second highest percentage

If still not successful, try the third, and fourth percentage

Call VisitorFun after fourth unsuccessful attempt
