

FLAGSTAFF

2019 OFFICIAL VISITOR GUIDE

Celebrating Flagstaff's Scientific Role
in the Apollo Moon Missions

discoverflagstaff.com

WELCOME

Flagstaff is located in the mountains of northern Arizona, and is the destination for all seasons and all types of adventurers. Depending on the time of year and your calling for outdoor adventure, your experiences could include world-class downhill skiing, hundreds of miles of scenic trails for hiking, biking and running, outdoor festivals from May to October, magnificent fall colors, or a gaze at the stars – as Flagstaff is the first designated International Dark Sky City.

Flagstaff is the best of both worlds; after a day of exploring the many nearby national monuments and Grand Canyon National Park, enjoy a vibrant city at night. Enjoy one-of-a-kind local shops, art galleries, dining and seven award-winning craft breweries in a historic downtown setting.

For the history buffs, 2019 celebrates the first Moon landing. Much of the lunar mapping for the Apollo missions and training for the famed NASA astronauts happened right here in Flagstaff. There will be celebrations, suggested itineraries, and activities throughout 2019 – with the date of July 20, 2019 as the actual day of the 50th anniversary of this historic leap for mankind.

We invite you to turn the pages and start planning your uniquely Flagstaff vacation now.

Trace Ward, CDME
Flagstaff CVB Director
