DINOLABS & DINODIG®

Learn about dinosaurs that roamed in your own backyard millions of years ago!

In DinoLabs you'll discover full articulations of dinosaur skeletons native to North Texas and cutting-edge technology that brings the experience to life! Explore DinoDig® and make your own discoveries in a replica field site. Inside DinoLabs you can explore the world in ways you never imagined. From bone to stone, ancient fossils reveal how dinosaurs roamed and fought, how they lived and died.

DINO GLOW™

Meet our newest dinosaur, DinoGlow! Have you ever wondered what dinosaurs really looked like when they roamed the earth, millions of years ago? Did they have scaled skin in muted colors that provided exactly the right kind of camouflage? Did they have feathers? Were they brightly colored and vivid? Science tells us the answer to these questions is yes! With DinoGlow you can imagine how.

DIG

UNCOVER

EXCAVATE

DINODIG®

Become a paleontologist as you discover the skills needed to uncover and excavate fossils!

DinoDig® replicates the field site at the Hood County Jones Ranch where the *Paluxysaurus jonesi* was discovered in 1982. DinoDig® features rock formations embedded with fossils based on the actual dig site. As museum guests explore the sandy ground of DinoDig®, they will discover authentic local fossils of clams, snails, sea biscuits, and ammonites dispersed throughout the exhibit. Don't miss this all-time favorite destination for young guests to the Museum.
