MACHINES IN MOTION

Experience the genius of Leonardo da Vinci through over 30 machines based on his visionary designs. Each machine has been faithfully constructed from Leonardo's notebooks by a modern team of scientists and craftsmen in the heart of the Renaissance, Florence, Italy.

Set the machines in motion. Explore the range of mechanical principles Leonardo employed. See the mind of the ultimate Renaissance man at work through his notes and drawings. Compare Leonardo's designs with today's innovations: flying machines, machine gun, parachute, automated printing press, armored tank, robot--and much more.

Come experience genius in motion.
