ALIEN WORLDS AND ANDROIDS

Join scientists in their search for alien life in and beyond our solar system and discover strange alien-like creatures found here on Earth.

Alien Worlds & Androids brings guests face-to-face with worlds far beyond their own, and introduces the technology that takes them there. Guests will also discover the difference between androids and robots through the lens of science with an up-close look at famous sci-fi robots from movies, such as Iron Man, the T-800 from Terminator, C3PO from Star Wars and more.
