### Why the Academy was Created :

- **Because the game of football has dramatically changed.** We saw the need to create an ACADEMY utilizing a NEW, world-class football curriculum that is fit to train the nation's talented and hungry football stars of tomorrow.

- **Because every athlete faces a unique and exciting journey.** Our program strives to provide each athlete with an individualized evaluation of their strengths and weaknesses, so that they can target specific skills throughout their post-academy practice sessions and improve.

- **Because great football players are made, not born.** Ask yourself, "What can 22 hours solely dedicated to refining your football skills do for you?"

So, we brought together the NFL's top coaches and the nation's best sports scientists to work side by side with award-winning trainers in the mission to create the future of football training.

Thus, the Academy was created - a place in which talented and hungry athletes are called upon by the very best who have ever played the game of football...
