JURASSIC GARDEN

MAY 21-OCTOBER 3, 2016

Travel back millions of years to explore the lost world of dinosaurs and prehistoric plant life at Powell Gardens, Kansas City's botanical garden! See 11 different types of dinosaurs—18 lifelike replicas in all—created by Guy Darrough, a fossil preparation expert and illustrator. You will encounter a 27-foot Camarasaurus, a ferocious 32-foot T Rex, a leaping Syntarsus, a 30-foot Hypsibema (Missouri's state dinosaur) protecting its nest and more!

This prehistoric adventure, which is included with Garden admission, gives kids an opportunity to see what it's like to be a paleontologist at the life-sized dino dig and discovery stations. Visit powellgardens.org/JurassicGarden for a list of related programs.

Thank you to our Jurassic Garden sponsors:

Ash Grove Charitable Foundation

Garden Hours:
9 a.m. - 6 p.m. daily
