

# FREQUENTLY ASKED QUESTIONS

## How long is the trip?

Trips departing from Niagara on the Lake are 60 minutes while tours departing from Lewiston NY are 45 minutes.

## Where does the boat go?

From either departure point we travel up river and into the Niagara Gorge. The boat makes its way into the famous Niagara Whirlpool and then we head back on down through the Devil's Hole Rapids. You return to the same location from which you boarded as our tour is a round trip excursion.

## Has the boat ever gone over the Falls?

Our trip is located down river from Niagara Falls, so it is impossible for our boats to go over the Falls. The closest our tour gets to the Falls is the Whirlpool, which is approximately one mile north. A good section of class six whitewater keep us from going any further up river.

## How many people does the boat hold?

We have eight boats in our fleet. The Jet Dome holds 40 passengers. Five of our Wet Jet boats hold 48 passengers each and two of our Wet Jet boats hold 54 passengers.

## Are there any age or height restrictions to ride on the Jet Boat?

For the Wet Jet trip you must be at least 44 inches tall (average 6-year-old). For the Jet Dome trip you must be at least 40 inches tall (average 4-year-old).

## Can seniors take part in the trip?

There is **NO AGE LIMIT!** We do maintain, however, that participants of any age should be of good health, free of heart, neck, or back issues and not pregnant. Also, seating in the boat is first come, first serve and cannot be reserved. People with young children must sit towards the back of the boat.

## Do you get wet on the trip?

On the Wet Jet tour you get absolutely soaked. At times during your Wet Jet experience, specifically in the Devil's Hole Rapids, you can be seated knee deep in water in the boat. Regardless of the gear we provide, we recommend you bring a complete change of clothes as we have change rooms on site. Guests on our Jet Dome tour will remain dry.

## I know I'm going to get wet but is there some sort of gear you provide Jet Boaters?

Yes, we do provide gear to our Wet Jet passengers to help keep you more comfortable on board. The gear is useful in keeping you a lot warmer (but certainly not drier). These are the items we provide: sweaters, full length zip up jumper, poncho, life vest (of course) and a pair of wet suit booties. Passengers can choose to wear their own footwear or sandals but must realize they will be getting wet. If choosing to wear your own sandals they must have a back strap.
