

Outer Cape Health Services is here for you, when and where you need us.

At Outer Cape Health Services, your health is our mission. Not only do our providers and staff live here on Cape Cod, they are committed to providing you with high-quality care and excellent service. With locations in Provincetown, Wellfleet and Harwich Port, you will find the best doctors and care teams—close to where you live—at Outer Cape Health Services.

Each of our health centers functions like any doctor's office, but with added services that make it easier for our patients, including pharmacy service. Healthcare visits, checkups, screenings, management for chronic conditions, and other social service offerings are also available.

We are a non-profit organization that cares for all patients, regardless of an ability to pay or insurance status. Our focus is on providing you the very best healthcare, but with extra support that includes programs and education that help improve your overall health.

As reimbursements received do not always cover the true cost of providing care, we do accept tax-deductible gifts from grateful patients and donors at outercaphe.org/donate.

HEALTH SERVICES

Community Healthcare Focused on You

We know you by your name, not your patient ID.

As a medical home open to all, Outer Cape Health Services has been a reliable resource for prevention, wellness and high-quality healthcare since 1987.

Our focus on your health and education makes the care we deliver truly unique. As a health center for the rural Lower and Outer Cape communities, OCHS brings much more personalized healthcare than most urban settings can deliver. Our patients say they come to us and feel like a person, not a number. We look at each patient as a whole human being. We also listen and give the very best advice with your well-being in mind.

We accept new patients with almost all types of insurance, including MassHealth, Medicare and private insurances. And if you need help finding insurance, our Healthy Connections program is here to help you at any time. At Outer Cape Health services, you are more than a patient—you are our neighbors.

Our services include:

Primary Care

Behavioral Health

Pharmacy

Women's Health

Family Planning

Urgent Care (Provincetown)

Substance Use Disorder Treatment

Women, Infants and Children (WIC)

Insurance Enrollment Assistance

Community Resource Navigators

On-Site Lab Drawing (operated by Quest Diagnostics)

Specialty Services: Dermatology, HIV Care, Optometry, Orthopedics, Pulmonology, Radiology

Our care teams are always focused on you.

Quality and satisfaction are the cornerstones of our care, validated by consistently high patient ratings. In fact, federally-qualified community health centers like Outer Cape Health Services are held to even higher performance and quality standards than most private practices. With patient satisfaction in mind, our skilled professionals work closely together to provide the very best healthcare experience possible.

Our team-based approach is always patient-centered. Physicians specializing in family and internal medicine, along with nurse practitioners or physician assistants work to ensure that you and your family receive the best care in the most modern settings.

With your convenience in mind, we also offer you an easy and secure way to manage your health information through an online Patient Portal. This added service gives you secure access to your health information and the ability to engage your healthcare team.
