TYRANNOSAURS

MEET THE
FAMILY

THEY'RE INVADING OMAHA
& THEY BROUGHT THE WHOLE FAMILY!

THE DURHAM MUSEUM

DURHAMMUSEUM.ORG

What has 60 razor-sharp teeth, bone-crushing jaws, lived 68 million years ago and is visiting The Durham Museum this summer? Tyrannosaurus rex...arguably the world's most popular dinosaur!

Tyrannosaurs: Meet the Family is the world's first exhibition showcasing the newly-revised tyrannosaur family tree and shows how this group became the world's top predators with their massive skulls, powerful jaws and bone-crunching teeth. While the most famous member of this family was the mighty T. rex, tyrannosaurs came in all shapes and sizes.

Using cutting-edge technology, this innovative, multimedia experience features more than 10 life-sized dinosaur specimens on display, including one of the oldest tyrannosaurs, Guanlong wucaii. With a dramatic array of fossils and casts of tyrannosaur specimens, *Tyrannosaurs: Meet the Family* provides a snapshot of dinosaur life.

An exhibition created by the Australian Museum and toured internationally by Flying Fish Exhibits
