

## Insurance and Payment Options.

### Insurance

We have relationships with many dental insurers. Please provide your insurance card on your first visit, and let us know of changes in coverage or carriers on subsequent visits. We'll work within your policy to help you get the maximum benefit from your insurer. Remember that many procedures may not be fully covered; in those instances, you are responsible for the remaining amount. We'll be happy to work with you and explain your payment options.

### Payment Options

Before proceeding with treatment, we will provide a written estimate of fees and let you know what is covered under your insurance. We'll be happy to work with you to arrange payment options.

### Payment Options Include:

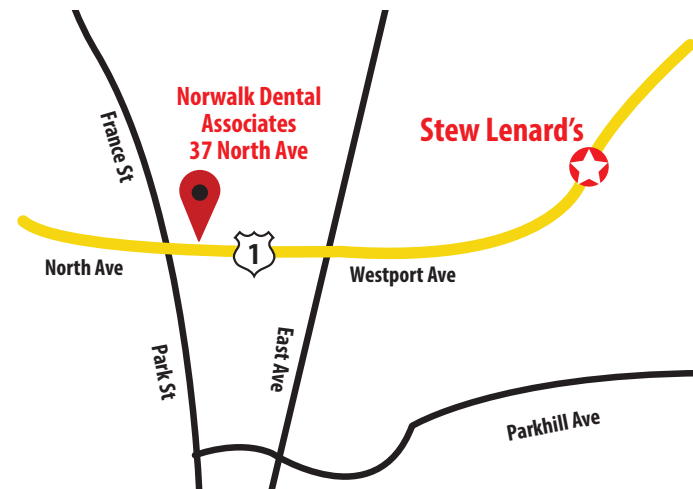

- VISA "or MasterCard"
- Debit Card
- Personal Checks
- In-office payment plan pending approval

We want you to feel comfortable and confident in all aspects of our practice. If you have questions about fees, insurance, payment of financing, please don't hesitate to ask.

## We Value Your Referrals.

If you're joining us as the result of a referral, we'd like to thank you for putting your trust in us. We look forward to caring for you and your family. After you have a chance to get to know us, we hope you'll tell more of your friends and family about our office.

## You are a Part of Our Family!

Thank you for giving us the opportunity to provide you and your family with complete, comfortable dental care. Whether you need preventive care, restorations, cosmetic treatment or a combination of services, we can help you achieve and maintain the healthy, radiant smile you deserve.

### We Are Committed

To Offering You:

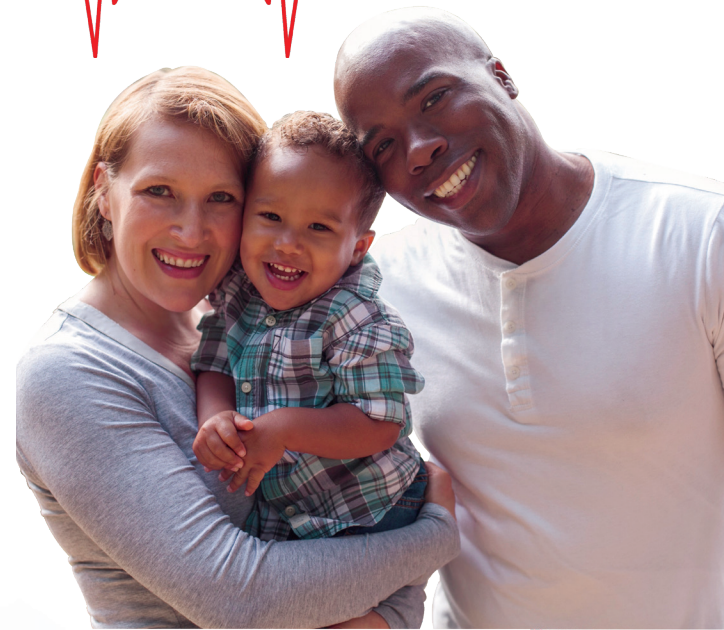

- A comfortable, low-stress environment
- Friendly, knowledgeable office staff
- The most up-to-date equipment and procedures
- On-time appointments
- Open, honest communication

## Your Health Depends on a healthy Mouth.

Ongoing research proves there are many connections between a healthy mouth and your overall health. In fact, it's proven that people who keep all their teeth live an average of 10 years longer!

Periodontal (gum) disease is one of the most common oral health issues and, if left untreated, can lead to heart disease, diabetes and tooth loss. The good news is it can be reversed in the early stages or prevented entirely with regular preventive visits and proper home care.

Help us give you the best care by keeping us informed of any changes in your health status, new or different medications and supplements you are taking, and new or worsening pain in your head, neck and jaw. The more information we have about your overall health, the better treatment we can provide.

## Advanced Treatment for Comfortable Care.

We are proud to practice the most current innovations in the dental technology. Today's diagnostic procedures are more thorough and accurate than ever before, while treatments are often faster, less invasive and much more comfortable than what you may be used to. There's no longer any reason for treatments to be painful, or for the results to be anything less than what you imagine.

### In-office Evaluations and Treatments Include:

- Complete preventive care
- Periodontal (gum) treatment
- Tooth-colored fillings
- Dental Sleep Medicine, Snoring and Sleep Apnea
- TMJ (bite and jaw) issues
- Restorations including implants, crowns and bridges
- Sealants (for children and adults, too!)

### Transform Your Smile!

With nearly 70% of American adults saying an attractive smile is necessary for both personal and professional success, it's important yours be as healthy and beautiful as nature intended. Our cosmetic procedures are safe and affordable; many offer dramatic results with just one visit!

### If You're Interested, Please Ask Us About:

- Tooth whitening
- Tooth straightening and/ or reshaping
- Veneers
- Root canals
